Luke 21:34-36—"But take heed to yourselves, lest your souls be weighed down with self-indulgence, and drunkenness, or the anxieties of this life, and that day come on you suddenly, like a falling trap; for it will come on all dwellers on the face of the whole earth. But beware of slumbering; and every moment pray that you may be fully strengthened to escape from all these coming evils, and to take your stand in the presence of the Son of Man" (Weymouth New Testament).

An article by Stasia Decker-Ahmed titled "What Would the Devil Have to Do Today to Destroy America?" was posted at americanthinker.com on Aug. 25, 2022. Following is the article.

In 1965, columnist and commentator Paul Harvey wrote an interesting piece titled, "If I were the Devil." This was basically a commentary on what Harvey would do if he were Satan and wanted to destroy America.

Nearly 60 years later, most of what Harvey predicted has come to pass. While America has not been completely destroyed, our nation is clearly in decline. In 2022, here's what I would do if I wanted to finish the job.

- I'd Devalue the Currency

The United States is approximately 30 trillion dollars in debt. But I wouldn't stop there. I know the dollar isn't going to be the world's dominant reserve currency much longer, so I'd continue to sedate the drooling, self-pleasuring masses with cradle-to-grave entitlements and stimulus checks for as long as possible. In order to implement the Great Reset and usher in the new globalist system, it will be necessary to print the dollar into oblivion and replace it with a digital currency.

- I'd Develop Hyper-Inflation

The obvious result of extensive money-printing and endless free government programs is inflation. Everything from food and fuel to housing and cars will quickly become unattainable for the average family. But this isn't enough. I'd continue devaluing the currency until hyperinflation set in. Along with more empty shelves, it won't be long until we start seeing food rationing, social unrest, and possibly even food riots in the hardest hit areas.

- I'd Diminish Energy Independence

After food security, energy is what's necessary to keep a society running efficiently. To destroy America's energy independence, I'd cancel the Keystone XL pipeline, impose extreme environmental rules on gas emissions, and pause natural gas and oil leases on all federal land. I'd insist that everyone get his energy from windmills, solar panels, and electric cars

that only the wealthy can afford. I'd make sure rolling brownouts and blackouts increasingly occur until America becomes a third-world nation.

- I'd Defund the Police

I would attack, demoralize, and ultimately drain money and resources from police departments across the country. During this time, I would make sure the elites of society from politicians to celebrities were well protected with police escorts and armed bodyguards. I would then sit back and watch the carnage unfold. That's when I'd implement my real agenda: a [nationalized](#) police force similar to what's found in Communist China and Cuba.

- I'd Disarm the Citizens

I'd make sure the citizens are at the mercy of the government and the nationalized police force by passing extensive legislation to limit Second Amendment rights. But I don't want to take away just assault rifles or semi-automatics. I want to take away everything. If I wanted to destroy the country, I would agree with the article published in the [Nation](#) on August 17, 2019, in which the writer stated: That leads to only one logical conclusion. Repeal the Second Amendment and start over from presumption that you do not need a gun unless you are going off to war or going off to train for war.

- I'd Demolish the Voting System

If I were trying to destroy America, I would insist it were racist and bigoted to require any type of identification to vote. Never mind that photo identification is required for everything from drinking a beer to driving a car. I would argue that voting ID discriminates against minorities and poor individuals. Of course, extensive identification is required to apply for Medicaid and almost any type of government assistance. But I wouldn't let pesky facts like that dissuade me. Without required identification, the voting process would eventually become chaotic and untrustworthy, and ultimately undermine our entire democratic process.

- I'd Destroy the Education System

I would give teachers' unions unprecedented power. I would allow basic academics to be superseded by woke theology and social justice mandates. I would also eliminate school choice and make it as difficult as possible for parents to educate their children outside the government-run school system. This would produce a nation of surly Bolsheviks who are unable to do simple math, write a coherent paragraph, or read at grade level. But they will be able to protest and burn down entire swaths of once great cities.

- I'd Destabilize the Mind

Finally, I would promote what was abnormal as normal and insist that unscientific delusions are fact. I would normalize and legalize drugs, even though we have a record number of individuals dying from drug overdoses. Once enough people are addicted to drugs and enough minds are destabilized, the masses will more easily believe what is illogical. I would then convince people of ludicrous ideas, such as math is racist and the patriarchy is responsible for every social ill. I'd tell three-year-old children they have the capacity to choose their own gender while twenty-five-year-old adults should enjoy an extended adolescence living in Grandma's basement smoking weed and indulging in endless sexual experimentation.

Why destroy this once great nation? In a word, globalism.

Many of those in power, from politicians to organizations such as the United Nations and the World Economic Forum, are pushing us toward a globalist system. The globalists aren't even trying to hide their agenda any longer. Klaus Schwab writes about the Great Reset at the World Economic Forum, while Joe Biden talks about how we're going through an incredible transition in the push to radically change how we support our energy needs.

Unfortunately, by the time the globalist system is fully in place, many Americans will welcome it with open arms. They will gladly trade all their privacy and freedom for social justice and a monthly pittance in the form of guaranteed income from the government. Freedom of speech, religious liberty, property rights, and gun rights will be greatly diminished or gone.

If I were the devil, this is what I would do to destroy America and usher in the Great Globalist Reset. Of course, I don't have to do any of these things. Our current leaders are more than adequately getting the job done.

An article by Larry Elder titled "Climate Change Forecasts" was posted at townhall.com on Aug. 25, 2022. Following is the article.

-
- " 'The trouble with almost all environmental problems,' says Paul R. Ehrlich, the population biologist, 'is that by the time we have enough evidence to convince people, you're dead . . . We must realize that unless we are extremely lucky, everybody will disappear in a cloud of blue steam in 20 years.' "—The New York Times, 1969.
 - "No real action has been taken to save the environment, (Ehrlich) maintains. And it does need saving. Ehrlich predicts that the oceans will be as dead as Lake Erie in less than a decade." —Redlands Daily Facts, 1970.

- "Scientist Predicts a New Ice Age by 21st Century: Air pollution may obliterate the sun and cause a new ice age in the first third of the next century. ... If the current rate of increase in electric power generation continues, the demands for cooling water will boil dry the entire flow of the rivers and streams of continental United States. ... By the next century 'the consumption of oxygen in combustion processes, world-wide, will surpass all of the processes which return oxygen to the atmosphere.'" —The Boston Globe, 1970
- "The world could be as little as 50 or 60 years away from a disastrous new ice age, a leading atmospheric scientist predicts. ... 'In the next 50 years,' the fine dust man constantly puts into the atmosphere by fossil fuel-burning could screen out so much sunlight that the average temperature could drop by six degrees. If sustained 'over several years' —'five to 10,' he estimated — 'such a temperature decrease could be sufficient to trigger an ice age!' — Washington Post, Times Herald, 1971.
- "Dear Mr. President: . . . We feel obliged to inform you on the results of the scientific conference held here recently . . . The main conclusion of the meeting was that a global deterioration of climate, by order of magnitude larger than any hitherto experienced by civilized mankind, is a very real possibility and indeed may be due very soon. The cooling has natural cause and falls within the rank of processes which produced the last ice age. ... The present rate of the cooling seems fast enough to bring glacial temperatures in about a century." —Brown University, Department of Geological Sciences, 1972.
- "However widely the weather varies from place to place and time to time, when meteorologists take an average of temperatures around the globe they find that the atmosphere has been growing gradually cooler for the past three decades. The trend shows no indication of reversing.
- "Climatological Cassandras are becoming increasingly apprehensive, for the weather aberrations they are studying may be the harbinger of another ice age. Telltale signs are everywhere—from the unexpected persistence and thickness of pack ice in the waters around Iceland to the southward migration of a warmth-loving creature like the armadillo from the Midwest. Since the 1940s the mean global temperature has dropped about 2.7 (degrees) F. Although that figure is at best an estimate, it is supported by other convincing data. When Climatologist George J. Kukla of Columbia University's Lamont-Doherty Geological Observatory and his wife Helena analyzed satellite weather data for the Northern Hemisphere, they found that the area of the ice and snow cover had suddenly increased by 12% in 1971 and the increase has persisted ever since. Areas of Baffin Island in the Canadian Arctic, for example, were once totally free of any snow in summer; now they are covered year round." -Time Magazine, 1974.

- "A senior U.N. environmental official says entire nations could be wiped off the face of the Earth by rising sea levels if the global warming trend is not reversed by the year 2000."—Associated Press, 1989.
- "Unless drastic measures to reduce greenhouse gases are taken within the next 10 years, the world will reach a point of no return."—former Vice President Al Gore, 2006.
- "The world is going to end in 12 years if we don't address climate change."—Rep. Alexandria Ocasio-Cortez, 2019.

Isaiah 55:6-11—"Seek you the Lord while He may be found, call upon Him while He is near. Let the wicked forsake his way, and the unrighteous man his thoughts; let him return to the Lord, and He will have mercy on him; and to our God, for He will abundantly pardon. 'For My thoughts are not your thoughts, nor are your ways My ways,' says the Lord. For as the heavens are higher than the earth, so are My ways higher than your ways, and My thoughts than your thoughts. For as the rain comes down, and the snow from heaven, and do not return there, but water the earth, and make it bring forth and bud, that it may give seed to the sower and bread to the eater, so shall My word be that goes forth from My mouth; it shall not return to Me void, but it shall accomplish what I please, and it shall prosper in the thing for which I sent it."
