

# EYE ON THE WORLD

## Dec. 3, 2022

This compilation of material for "Eye on the World" is presented as a service to the Churches of God. The views stated in the material are those of the writers or sources quoted by the writers, and do not necessarily reflect the views of the members of the Church of God Big Sandy. The following articles were posted at churchofgodbigandy.com for the weekend of Dec. 3, 2022.

### Compiled by Dave Havar

**Luke 21:34-36**—"But take heed to yourselves, lest your souls be weighed down with self-indulgence, and drunkenness, or the anxieties of this life, and that day come on you suddenly, like a falling trap; for it will come on all dwellers on the face of the whole earth. But beware of slumbering; and every moment pray that you may be fully strengthened to escape from all these coming evils, and to take your stand in the presence of the Son of Man" (Weymouth New Testament).

"Eye on the World" comment: The following headlines involve articles that are considered international. The articles were not posted, but the headlines give the essence of the story.

---

### Democracies are in decline

- An article by Tom Brown titled "Half of the World's Democracies Are in Decline (Including the U.S.) With 'Severe Head Winds' Fanned by Ukraine War, Economic Crisis and Covid—Think Tank [IDEA—International Institute for Democracy and Electoral Assistance]" was posted at dailymail.co.uk on Nov. 30, 2022. (The think tank covers 173 countries, claims that 104 were democracies and that 52 of those democracies were in decline.)

### England is no longer a Christian nation

- An article by Peter Caddle titled "England No Longer a Christian Nation as Atheism and Islam Make Gains—Census" was posted at Breitbart.com on

Nov. 29, 2022.

### **World Economic Forum praises China?**

- An article by Kurt Zindulka titled "WEF's Klaus Schwab Says China Will Be a 'Role Model' in the 'Systemic Transformation' of the World" was posted at [breitbart.com](https://www.breitbart.com) on Nov. 24, 2022.

### **Apple censorship—China**

- An article by Coco Feng titled "Apple Restricts AirDrop Feature for China Users in Latest iOS Update" was posted at [scmp.com](https://www.scmp.com) on Nov. 10, 2022.
- An article by Staff titled "Apple's Reliance on China Grows Perilous With Chaos in iPhone City [Zhengzhou]" was posted at [bloomberg.com](https://www.bloomberg.com) on Nov. 24, 2022.
- An article by Roberto Wakerell-Cruz titled "DeSantis Slams Apple as 'Vassal of the CCP' After It Limits AirDrop on Chinese iPhones" was posted at [thepostmillennial.com](https://www.thepostmillennial.com) on Nov. 29, 2022.
- An article by Tucker Carlson titled "Apple Is Now an Active Collaborator With China's Murderous Police State" was posted at [foxnews.com](https://www.foxnews.com) on Nov. 29, 2022.
- An article by Staff titled "DeSantis Hammers Apple for Helping Communist China Squash Protesters" was posted at [dailywire.com](https://www.dailywire.com) on Nov. 30, 2022.
- An article by Elizabeth Elkind titled "Republicans Threaten War With Apple If It Removes Musk's Twitter From App Store and Continues to 'Aid' China's Regime: GOP Members Say No Firm Should Have This Much Power and Slams Firm for AirDrop Update That Made It 'Harder' for 'Zero Covid' Protesters" was posted at [dailymail.co.uk](https://www.dailymail.co.uk) on Nov. 30, 2022.
- An article by Andrea Cavallier titled "The Apple of China's Eye! Tim Cook Tows the Beijing Line and Refuses to Condemn the Violent Suppression of Anti-Lockdown Protests—or Say Whether He Sympathizes With Beaten iPhone Factory Workers During Capitol Hill Meeting" was posted at [dailymail.co.uk](https://www.dailymail.co.uk) on Dec. 1, 2022.

### **Covid protests in China**

- An article by Ryan Saavedra titled "Protests Are Spreading in China as Backlash Grows to the Communist Nation's Lockdowns: Report" was posted

at dailywire.com on Nov. 24, 2022.

An article by Scott Powell titled "Xi Jinping's Abrupt Reversal of Fortune Provides a Wake-Up Call and New Direction for America" was posted at

townhall.com on Nov. 29, 2022. Following are excerpts of the article.

---

While there have been protests against COVID testing and quarantine requirements associated with zero-COVID policies over the last year in China, they were limited to a few localities.

But the death of 10 people in Urumqi, China, on November 25, 2022—who were burned alive in an apartment building with doors having been welded shut by government officials—catalyzed a larger response.

Massive waves of street protests have swept through at least eight large Chinese cities and dozens of university campuses over the last few days.

The simmering grievances against excessive COVID testing and quarantine requirements have now intensified into bold and outspoken opposition against Xi Jinping and the Communist Party.

In Beijing on Sunday, protesters chanted, “we don’t want a leader, we want votes” and “don’t be a slave, be a citizen.” In Shanghai, protesters have demanded, “Xi Jinping! Step down! CCP! Step down!”

The situation coming out of these sudden protests may be more dangerous than the Tiananmen Square massacre in 1989 to the continuity of China because then the protesters wanted the removal of some government leaders while keeping the Communist Party.

Now, even with more risk to dissenting Chinese due to the totalitarian surveillance state that exists throughout China, protesters are more brazen—willing to protest the government with placards touting anti-regime slogans, and engaging in group chants, calling for “freedom of expression,” and “ending the rule of Xi Jinping.”

It may be that the dictatorial anti-rational rule imposed on the people by the Chinese government response to lingering Covid-19 transmission, may contain within it the seeds of the CCP’s undoing.

More than a decade ago, Chinese-American political scientist and China governance expert Minxin Pei made this very case against Mao Zedong—the very leader who Xi Jinping wants to emulate—noting that, “While trampling institutional rules and norms may benefit autocratic rulers, it is not necessarily good for their regimes.”

The large-scale medical imprisonment of populations that started with the COVID-19 virus release in Wuhan and spread to other Chinese cities was

exported to Europe and the United States in the first quarter of 2020.

As if in coordination, the WHO, the World Economic Forum, the CDC, Bill Gates, and Anthony Fauci all jumped on the bandwagon with praise for the China lockdowns.

In the United States, those lockdowns and the associated fear factor not only shut the economy down, but provided an ideal environment for leftist Democrat activist lawyers to succeed in forcing change in state election rules to their advantage, such as allowing wholesale distribution of mail-in ballots, the legitimization of ballot harvesting, the extension of deadlines for counting ballots, and legal challenges to voter ID and signature verification laws.

All of which contributed to election irregularities and the subsequent loss of the legitimacy of the U.S. government on the world stage.

In addition, to the effects of lockdowns, America has experienced the following.

- Unprecedented censorship.
- The corruption of science and the administration of health care.
- The decertification of dissenting doctors.
- The banning of non-vaccination alternative preventive therapeutic treatments for COVID.
- And later, the mandatory injections of an emergency use authorized COVID-19 vaccine formula with a safety profile that's being increasingly questioned.

The Chinese people are exhibiting extraordinary courage in revolting against the CCP and calling for its demise.

Meanwhile, the elites behind the Biden administration don't know what to do.

They know that if they support the Chinese people's revolt, they will also be acknowledging the irrationality of the CCP's policies.

And by implication, they would be indicting their past COVID policies and potentially undermining the ability to use future pandemics to gain greater control and consummate the Great Reset.

In summary, what is happening now halfway around the world in China has tremendous implications for reversing the political corruption and loss of freedoms that Americans have been experiencing.

The Chinese regime as a shining model for the Great Reset of Klaus Schwab and his World Economic Forum is collapsing before our very eyes.

The Great Reset—from its government controlled digital currency, universal health passports, and its wall-to-wall surveillance state—has no place in America or any country that values liberty, truth, and justice.

An article by Robert A. Taft titled “Triggering the Great Reset” was posted at [americanthinker.com](http://americanthinker.com) on December 1, 2022. Following is the article.

---

Both the East, led by China and Russia, and the West, led by U.S. and EU globalists, want to fundamentally change the world order. They call this change the Great Reset, first termed by Klaus Schwab, founder and executive director of the World Economic Forum (WEF).

The WEF consists of the world’s wealthiest people, including over 1,000 global corporations and most of the G-20 leaders. Schwab & Co. naively view China as a partner, with dictator Xi Jinping a regular forum keynote speaker. Although China and Russia are diehard nationalists, their mission dovetails with that of Western globalists, so, for now, Xi and Vladimir Putin play along.

Nationalist Donald Trump gave them a common enemy and COVID-19 set the East-West alliance.

During the Obama administration, China achieved enormous gains in overtaking the United States. China's rise was a boon for corporations. They ignored the \$600-billion-a-year thievery of American technology in hopes of accessing the largest market on earth, stocked with some of the cheapest labor and raw materials available.

- From 2016 to 2020, globalists and the Chinese watched helplessly as Donald Trump returned manufacturing to this country and increased wages for workers at an unprecedented rate.
- China experienced its worst economic years since their 2001 World Trade

Organization entry. Corporate lobbyists paid Uniparty politicians handsomely to overthrow the president.

- Wall Street teamed with China to try to halt Trump's tariff imposition on the communist nation and China paid nearly \$14 billion to politicians and 600 U.S. groups, all to work against Trump.
- High-tech capitalist companies like Google refused to work with the Defense Department but rolled over for China, our Number 1 foe.
- To slow the Trump engine, billionaires like Mike Bloomberg, George Soros, and Bill Gates poured in millions into the effort to increase the wealth gap between the elite and the worker bees, while China's slave labor provided the perfect model.
- So China and Western globalists formed their unofficial alliance to destroy Trump.
- On one side were the global corporations and the United Nations with their World Bank and International Monetary Fund and the Bank of International Settlements.
- On the other side, China, wanting its power to grow, welcomed help from naïve Western globalists. Wall Street began to funnel American investment funds into China companies to prop up the Chinese economy.
- Together, China and the Western globalists set the stage for COVID-19.

A year after Trump assumed office, Dr. Anthony Fauci announced a major pandemic would shortly strike the world. In October 2019, globalists Bill Gates and Mike Bloomberg organized *Event 201*. Its purpose: to simulate a pandemic. One hundred and thirty guests, including representatives from the Central Intelligence Agency (CIA), the Center for Disease Control (CDC), the World Health Organization (WHO) and global corporations, attended. The stated key to success to the Great Reset: world leaders must lockdown economies to stop the pandemic.

So COVID-19 helped the East and the West. While China measured its effectiveness militarily during the pandemic, the West gauged its ability to control and reduce the population. China launched a bioweapon without much global pushback and the West, through fear and misinformation, began to convert democracy into totalitarianism. And so the stage was set for Schwab's Great Reset as China became a reliable partner.

The G-20 brings together the world's major economies that account for over 80% of the world GDP and 75% of global trade. G-20 included Western and

Eastern leaders from developed and developing countries and became the perfect vehicle to advance the Great Reset.

This year's G-20 summit included two meetings.

- John Kerry, Biden's environmental czar, headed the first meeting in Egypt where he proposed that EU countries and the United States pay reparations to developing countries, including the world's worst polluter China, for environmental damage caused by the West. The outrageous price tag for this initiative and requisite environmental infrastructure: over \$7 trillion annually.
- The second meeting held in Bali, featured Klaus Schwab, who pitched his Great Reset, the systematic restructuring of the world where technology will change how people and government function.

Subsequent to the Bali meeting, East and West now agreed to the following.

- Implement communist-style totalitarian rule globally to maximize the wealth gap between the rich and the worker bees. Western globalists, led by Schwab, praise the Chinese system. They encourage Western financing, namely Wall Street, to bolster China's industry. China's model of slave labor utilization not only minimizes labor costs but also shows how low worker wages must fall to maximize profits and feed global oligarchs.
- Reduce global population. Since the launch of mRNA gene therapies passed off as legitimate vaccines, the death rate globally has increased by 40%. Schwab, nonetheless, is pushing the G-20 to globally implement regular mRNA vaccines and to mandate *vaxports* to monitor compliance. Travel and other restrictions would befall anyone not well jabbed.
- Control healthcare globally. Mandatory vaccines would both reduce population and result in windfall profits for the elites, while increasing their power over the masses and controlling the global death rate. China, by producing most of the ingredients in pharmaceuticals, not only would regulate the flow of these pharmaceuticals but also their content.
- Use technology to control global population and replace individuality with collectivism, i.e., everyone must think the same and commit to global governance. People would be monitored by China's Social Credit Scores and facial recognition IDs, not just *vaxports*.

- Advance transhumanism. People would be merged with technology to improve and better control them. Globalists are preparing for cyborg development by brainwashing children electronically with apps like China-backed *Tik Tok* whose purpose is to condition/program kids how to think about what they observe.
- Digitalize food processing and develop biotechnology to create what they call a sustainable food supply. Both Schwab and Biden, in his biotechnology executive order, call for building more equitable food systems.

But while the western and eastern participants share a vision for the Great Reset, there are significant differences that will eventually tear them apart.

An article by Jay Valentine titled “Here’s How They Did it: Real-time Election Fraud” was posted at [americanthinker.com](http://americanthinker.com) on Nov. 30, 2022. Following are excerpts of the article.

---

Database latency—a geeky term, but that’s how they did it!

Database latency is when current reality lags the underlying record.

A policeman pulls over a speeder. The police computer reports that three hours ago a similar vehicle and person held up a liquor store—so the police are on alert.

No database latency.

County election managers change the zip code of 31,000 voters on September 3. Ballots go out that week. Those 31,000 are undeliverable. Someone collects those valid ballots. On September 15, those addresses are quietly changed back.

National Change of Address Database (NCOA) will not pick up those address changes. They didn’t happen because there is no history.

The 31,000 citizens were getting their mail just fine—except for ballots. Ballot addresses were driven by the county mail-in ballot database—the one that was changed, then changed back.

Many states send ballots to everyone; the recipient is none the wiser that they never received a mail-in ballot. They may vote in person. Oops! "You already voted!" Ever heard that?

Welcome to database latency.

Our bad guy pals know they can change voter rolls, take an action, then change them back. Who would know?

A thousand voters are changed from inactive, voted, then changed back, and how would you ever know? With lots of complex footwork, you could eventually tell from their voter history file—months after the election.

What are you going to do about it? Reverse the election?

The ballot gathering scammers know about latency—it's their ground game!

To Republicans, election engineering is civics. To Democrats, it's business—and they are great at it!

They know the Republicans have hundreds of diligent election sleuths working in basements and dining room tables checking voter rolls for the dead and the fakes.

They know those people rely on NCOA and Melissa and other highly latent services as their baseline. If someone moved, it shows up in NCOA—two months later.

A real voter moved. They want to keep getting their St. Jude's donation cards. They fill in their NCOA form to get mail forwarded to their new address. Our fraud detectives find this person—and maybe someone voted for them. Cross out one phantom!

Our bad guys are happy to give up a few retail-level ballots to hide the wholesale-level ballot-gathering apparatus. They count on it.

Here's the fraud equation taking place across the country.

- Count the in-person votes.
- Shut down the system (Atlanta water leak, Maricopa County everything).
- Bring in undeliverable ballots gathered when you changed voters' names addresses or zip codes, then changed them back.
- Determine the votes you need to win. Press the "WIN" button.

- Wait for the Republicans to file a lawsuit months later.

Floating ballots are the lifeblood Democrats need to win—and win they do.

Ballot gatherers know Republicans use dumb technology—relational databases, SQL, NCOA, Melissa, all non-real time, highly latent systems.

Bad guys are happy to watch Republicans waste time finding ones and twos, while the real action takes place by the thousands—invisible to these batch, latency-prone systems.

The RNC helps with its antiquated “big data” system equally oblivious to anything that happens within a month.

We know an election commission is going to do anything possible to make the Democrat win. Wisconsin Election Commission, Arizona’s Maricopa County, seven states in 2016, for instance.

Rather than wasting time on batch NCOA, we get a daily copy of the election roll. That’s expensive! The list in Wisconsin is \$12,000! But did you know your Democrat friends bought it 28 times before the 2016 election?

What is a governorship worth? How much does a contested Senate seat cost? Maybe \$50 million? What is a presidential campaign worth?

Why would anyone spend \$50 million on a Senate seat and let the other side own the election rolls? That is a question Ronna McDaniel may be asked by Mike Lindell!

We take that election roll, with perhaps 15 million voters, Florida, for instance, or Texas—compare every voter against every other voter and address, down to the cell level, and see any differences—every day!

What do we find?

In a real-life example, this month, we found a county that changed 31,500 zip codes, yet the voter remained at the same address. Curious?

That means the voter did not change their address, continued to receive all their mail, except one item—a ballot sent from a voter commission.

Our teams in Wisconsin and Florida are discovering this scam by the truckload—do not email me that it is not real! And NCOA and Melissa? They are totally blind to this—because the addresses are changed back!

The Fractal team spent the last 20 months, with guidance from Mike Lindell,

encouragement from the great Sheriff David Clarke, and over a dozen election integrity teams advancing voter integrity analysis from the ancient, batch, latent to the modern, current real-time.

We learned the core strategy to fight ballot-gathering fraud in real time analysis of voter rolls and cast ballots. It is also real-time analysis of ballot collection points—like large apartment complexes and dorms where ballots gather because there is not an apartment number.

The question now is whether Republicans want to start leading with technology or continue to spend millions on “big data” “data driven” batch buzzwords.

We are about to find out.

**Isaiah 55:6-11**—"Seek you the Lord while He may be found, call upon Him while He is near. Let the wicked forsake his way, and the unrighteous man his thoughts; let him return to the Lord, and He will have mercy on him; and to our God, for He will abundantly pardon. 'For My thoughts are not your thoughts, nor are your ways My ways,' says the Lord. For as the heavens are higher than the earth, so are My ways higher than your ways, and My thoughts than your thoughts. For as the rain comes down, and the snow from heaven, and do not return there, but water the earth, and make it bring forth and bud, that it may give seed to the sower and bread to the eater, so shall My word be that goes forth from My mouth; it shall not return to Me void, but it shall accomplish what I please, and it shall prosper in the thing for which I sent it."
