Luke 21:34-36—“But take heed to yourselves, lest your souls be weighed down with self-indulgence, and drunkenness, or the anxieties of this life, and that day come on you suddenly, like a falling trap; for it will come on all dwellers on the face of the whole earth. But beware of slumbering; and every moment pray that you may be fully strengthened to escape from all these coming evils, and to take you stand in the presence of the Son of Man” (Weymouth New Testament).

An article by Staff titled "Project Veritas Video: Pfizer Official Says Firm Considering Ways to 'Mutate' Virus Via 'Directed Evolution'" was posted at dailywire.com on Jan. 26, 2023. Following are excerpts of the article.

A new undercover video from Project Veritas allegedly captures a Pfizer official saying the company has considered mutating the virus in order to create effective vaccines in advance, declaring that Covid will be a "cash cow" for years, and claiming federal regulators go easy on Pfizer in hopes of getting jobs later.

The 10-minute video, which was posted late Wednesday and had garnered more than 10 million views on Twitter alone by Thursday morning, shows a man identified as Jordon Trishton Walker (Pfizer's director of research and development, strategic operations and mRNA scientific planner) discussing the company in what appears to be a bar or restaurant. The Project Veritas employee, who does not appear on camera, prods him on various subjects.

"One of the things we're exploring is like, why don't we just mutate it [Covid] ourselves so we could create—preemptively develop new vaccines, right?" the man identified as Walker says.

"So, we have to do that. If we're gonna do that though, there's a risk of like, as you could imagine—no one wants to be having a pharma company mutating [expletive] viruses."

When the Project Veritas interviewer asks if such work would be illegal gain-of-function research, the man identified as Walker calls it "directed evolution" of the virus, which he insists is not the same thing.

"Don't tell anyone. Promise you won't tell anyone," Walker says on the video. "The way it [the experiment] would work is that we put the virus in monkeys, and we successfully cause them to keep infecting each other, and we collect serial samples from them."

Still, the man identified as Walker acknowledges that such research could be dangerous, saying an accident could trigger a repeat of what he suspects happened in the Wuhan lab where many believe Covid first escaped.

The man identified as Walker describes the relationship between Pfizer and government regulators as a “revolving door” which is “pretty good for the industry,” but bad for America.

“Because if the regulators, who review our drugs, you know that once they stop being a regulator, they want to go work for the company, they are not going to be as harsh on the company where they’re getting their job,” he says.

At another point in the video, he acknowledges that Covid has made Pfizer billions, and will likely continue to do so no matter how the virus evolves.

“Who knows? I mean, either way, it’s going to be a cash cow,” he says. “Covid will probably be a cash cow for us for a while going forward.”

Isaiah 55:6-11—“Seek you the Lord while He may be found, call upon Him while He is near. Let the wicked forsake his way, and the unrighteous man his thoughts; let him return to the Lord, and He will have mercy on him; and to our God, for He will abundantly pardon. ‘For My thoughts are not your thoughts, nor are your ways My ways,’ says the Lord. For as the heavens are higher than the earth, so are My ways higher than your ways, and My thoughts than your thoughts. For as the rain comes down, and the snow from heaven, and do not return there, but water the earth, and make it bring forth and bud, that it may give seed to the sower and bread to the eater, so shall My word by that goes forth from My mouth; it shall not return to Me void, but it shall accomplish what I please, and it shall prosper in the thing for which I sent it.”
